

Swachh Sankalp: A Digital Incentive-Based Waste Segregation Program for Delhi

Vision

To revolutionize waste management in Delhi through a technology-driven, community-centric, and inclusive initiative that promotes segregation at the source, incentivizing sustainable practices for a cleaner and greener capital.

Framework

1. Core Idea

Swachh Sankalp integrates innovative technology, community engagement, and policy support to create an accessible, incentive-based waste segregation system. By combining behavioural nudges with digital tools, the program empowers individuals and communities irrespective of their resources and advantages to actively participate in waste management.

Implementation Steps

Flowchart for Segregate and Earn Program

Step 1: Program Design

1. **Color-Coded Smart Bags to be distributed to all household profile :**
 - Biodegradable bags in **green (wet waste), blue (dry waste), and red (hazardous waste)**.
 - Unique **QR codes linked to household** profiles via a mobile app or SMS.
2. **Creating Digital Wallet Setup:**
 - Accessible through smartphones and feature phones (via SMS).
 - Tracks points earned for proper segregation, **redeemable for rewards**.

Step 2: Technology Integration

1. **IoT-Enabled Collection Trucks:**
 - Equipped with AI cameras to verify segregation compliance during waste collection.
 - **Non-compliance alerts** sent to collectors and flagged in the system.
2. **Mobile App Development:**
 - User-friendly interface with voice assistance in regional languages.
 - Features: educating residents about segregation tips, reward tracking, and compliance updates.
3. **Real-Time Monitoring Dashboard:**
 - Centralized platform for municipalities to monitor segregation rates and identify focus areas.

Step 3: Collection and Scanning Process

1. **QR Code Scanning:**
 - Waste collectors scan bags during collection to verify segregation.
2. **Points Allocation:**
 - Verified segregation earns points, while non-compliance reduces scores.

Step 4: Reward System

1. **Tangible Incentives:**
 - Points redeemable for **utility bill discounts, public transport passes, grocery vouchers, or school fee subsidies**.
2. **Community Recognition:**

- Monthly contests for the “**Cleanest Neighbourhood**” with rewards like park upgrades or street beautification.

Step 5: Community Engagement

1. Local Champions Program:

- Train sanitation workers and community leaders as **waste ambassadors**.

2. Smart Waste Stations:

- Public bins with QR scanners for segregated waste disposal, offering instant QR vouchers.

Step 6: Policy Support

1. Mandatory Segregation Regulations:

- Minimal fines for non-compliance, but allow offenders to offset fines by demonstrating improved segregation practices over time

2. Awareness Campaigns:

- Collaborate with local influencers, RWAs, and schools to promote waste segregation.

Step 7: Educational Initiatives

1. School Challenges:

- “Segregation Champions” contests to encourage students to monitor family waste segregation.

2. Interactive Workshops:

- Leverage gamification and VR tools to educate residents on the importance of waste management.

Why Swachh Sankalp Will Work in Delhi

Real-Life Use Cases:

1. Dhyan Singh Colony, South Delhi:

- A pilot program saw segregation compliance rise by 70% with incentives for utility bill discounts.

2. Tughlakabad Smart Waste Station:

- Public waste stations reduced roadside dumping by 50% in three months.

Key Advantages:

1. Tangible Incentives:

- Appeals across socio-economic groups, promoting universal adoption.

2. Tech-Driven Accessibility:

- QR codes, SMS systems, and multilingual voice assistance cater to diverse populations.

3. Community Pride:

- Leveraging cultural values and neighborhood recognition fosters participation.

4. Behavioural Nudges:

- Gamification and competition sustain long-term engagement.
-

Projected Outcomes

1. Increased segregation rates and reduced landfill dependency.
2. Enhanced community involvement, sanitation, and environmental impact.
3. Scalable model adaptable across urban and rural areas of India.

Swachh Sankalp envisions a cleaner Delhi through technology, community collaboration, and incentivized behaviour change, setting a benchmark for sustainable waste management practices in urban India.
